

1. The medium-term scheduler moves processes between the _____ queue and the _____ queue.
 waiting/blocked
 suspended waiting/blocked
2. In the context of process management, match the schedulers.
 Admission/Job scheduler - Long-term scheduler
 Memory scheduler - medium-term scheduler
 CPU scheduler - short-term scheduler
3. Check all schedulers that may be invoked right after a process terminates.
 medium-term scheduler
 short-term scheduler
4. This scheduler is involved when a process must be kicked out from the CPU.
 short-term scheduler
5. We want to sort the different schedulers from the most to the least frequently invoked by the operating system. The most frequent must be assigned 1.
 Admission/Job scheduler - 3
 Memory scheduler - 2
 CPU scheduler - 1
6. True or False?
 Is it a good idea to draw a Gant Chart? The coming set of scheduling questions applies to the same CPU scheduling policy, the same processes with the same arrival times and CPU bursts lengths. It will definitely pay off to draw a Gant chart for the first question and use the SAME Gant chart for the next ones.
 True
7. Based on the table below, Process P3 enters the exit or waiting.blocked queue the second time at _____.
 -1
8. Based on the table below, Process P2 enters the exit or waiting/blocked queue the first time at _____.
9. Based on the table below, Process P1 enters the ready queue the first time at _____.
 2
10. Based on the table below, the response time for Process P1 is _____.
 6
11. Based on the table below, Process P3 enters the exit or waiting/blocked queue the first time at _____.
 38
12. Based on the table below, Process P1 enters the running queue the second time at _____.
 28
13. Based on the table below, the turnaround time for Process P1 is _____.

28

14. Based on the table below, Process P1 enters the ready queue the third time at _____.
-1
15. Based on the table below, the response time for Process P3 is _____.
0
16. Based on the table below, Process P2 enters the running queue the third time at _____.
-1
17. Based on the table below, Process P2 enters the ready queue the second time at _____.
8
18. Based on the table below, the turnaround time for Process P3 is _____.
38
19. Based on the table below, Process P3 enters the ready queue the second time at _____.
4
20. Based on the table below, Process P3 enters the running queue the first time at _____.
0
21. Based on the table below, Process P1 enters the exit or waiting/blocked queue the second time at _____.
-1
